Time-savings with weighing scale pallet truck

The weighing scale pallet truck, WSP 2200, can transport and weigh goods in the same work process. No need for spending time for extra transport and loading! With the very high accuracy, it is perfectly suited for weighing goods in storage areas, for inspection of incoming goods and goods to be shipped etc.

The weighing system has four strong weighing cells, and a solid and very well protected display. The display has logic and simple settings, and is very user-friendly! It is centrally located, and reading can be done quickly and simply.

The construction of the pallet truck is strong and solid. It is very easy to operate and maintain.

FLEXIBILITY

- Can transport and weigh up to 2,200 kg
- Display with logic and simple settings

SAFETY

- The lowering function is controlled by a lowering valve
- High-pressure relief valve prevents overload

DURABILITY

- Display is well protected by a specially designed steel housing
- Strong construction
- Reliable leak-proof hydraulic system
- Lubricating nipples in the most important movable parts

WEIGHING FACILITIES:

- Tare function (gross and net weight)
- Counting and zero setting
- Summation of several weighings
- Four strong weighing cells, IP68
- Weighing cell accuracy: 99,95%
- Graduation: 1,0 kg
- Backlight display with clear figures (30 mm)
- Battery indicator
- Up to 250 operational hours per charge

MANOEUVRABILITY/UTILISATION OF SPACE

- Short length behind forks
- Tight turning angle
